

# Peace Of Mind During A Difficult Time

Shiva Deliva was created with this thought process in mind. First and foremost, we want to provide comfort to the mourning families by having a central location where family and friends can easily find important and pertinent information. The Shiva Deliva Registry allows the mourner (or a representative from the family) to create a profile for the deceased that includes complete funeral and Shiva details. Users can seamlessly set up a calendar of Shiva calls including dates and times, the types of meals that are preferred and the expected number of people. This information can easily and privately be shared across social media platforms or email via our “easy-share” buttons that are included on every registered Shiva.

In addition, Shiva Deliva understands that family and friends are not always close by. When loved ones reside out of town, many people are unsure of where to purchase food and comfort items to send. For this purpose we created the Shiva Deliva Directory. Users can quickly and easily search by city to locate preferred delis, restaurants, bakeries and specialty stores that are nearest to the Shiva house.

When creating the nation’s largest shiva registry and provider directory, we were determined to establish a way to memorialize each and every person.

For every shiva registered on ShivaDeliva.com, **we will plant a tree in Israel** in honor of your loved one’s life. We hope to provide a tangible legacy that creates everlasting remembrance.
